Healthcare Appointment Analysis

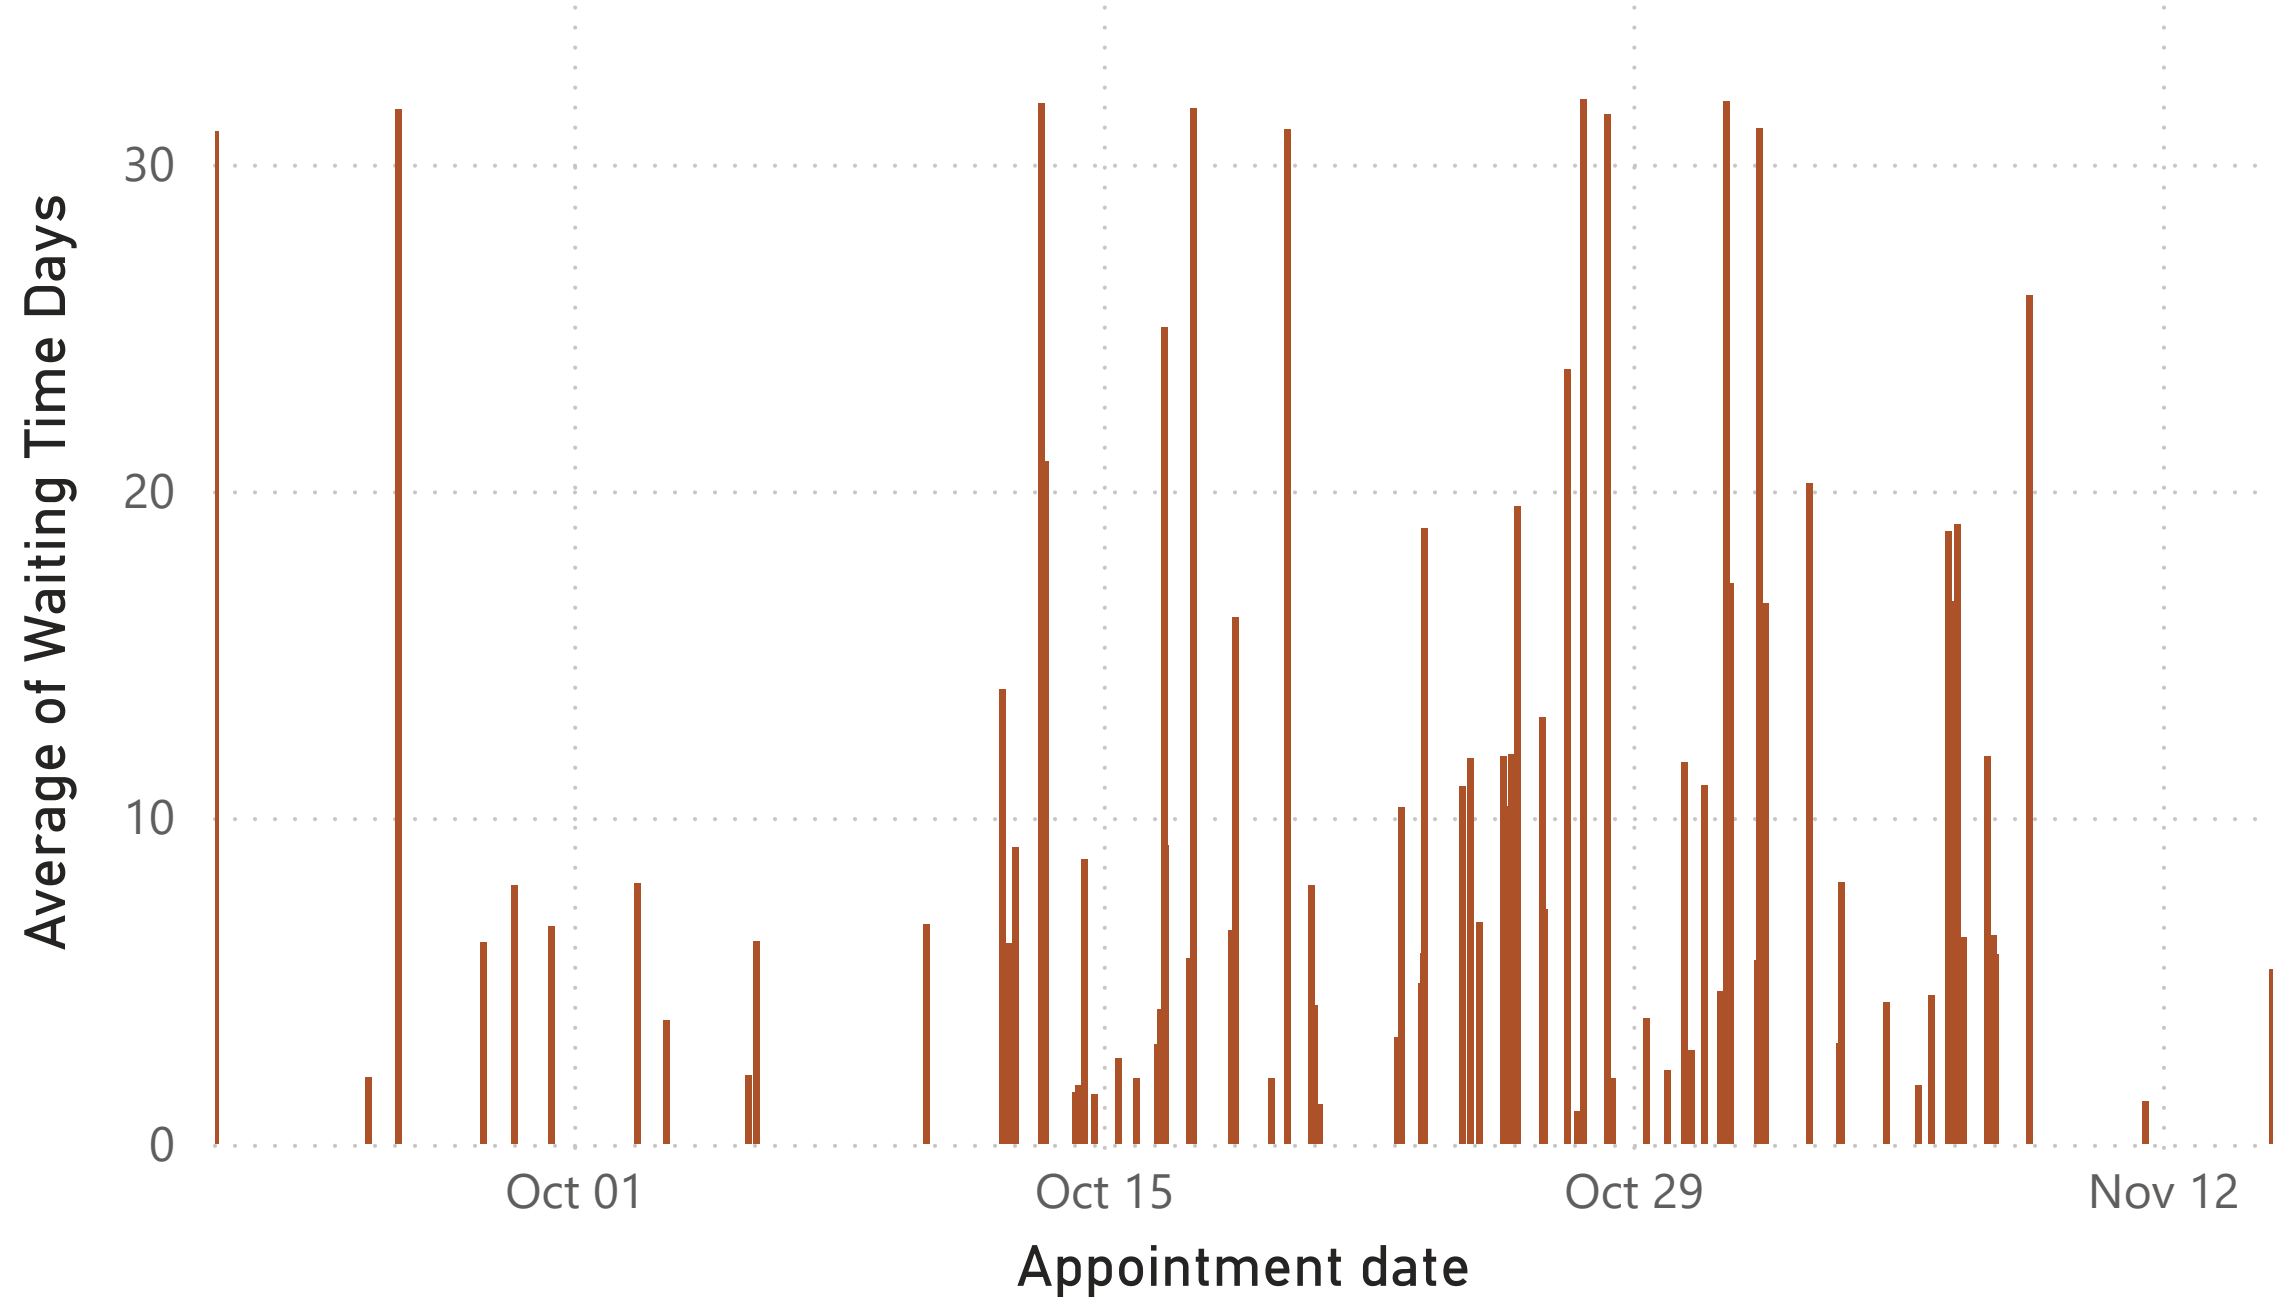

Average of Waiting Time (Days) by Provider Role

Waiting Time Summary Table

Year	Month	Day	Number of Patient(s)	Provider Role(s)	Average of Waiting Time (Days)
2023	September	21	1	1	31.00
2023	September	25	1	1	2.04
2023	September	26	1	1	31.67
2023	September	28	1	1	6.17
2023	September	29	1	1	7.92
2023	September	30	1	1	6.67
2023	October	2	1	1	7.96
2023	October	3	1	1	3.79
2023	October	5	2	2	4.15
Total			99	99	10.55

Average Waiting Time Over Time

Key Findings

1. The dashboard includes 99 appointments and 99 unique patients.
2. The overall average waiting time is 10.55 days.
3. Psychologist appointments have the highest average waiting time, followed by Nurse and MD.
4. MD has the highest appointment volume.
5. Appointment volume is generally stable, with only a few dates showing multiple appointments.

Recommendations

1. Review scheduling processes for Psychology appointments to reduce waiting time.
2. Monitor MD workload because MD handles the largest appointment volume.
3. Investigate appointments with waiting times over 30 days to identify scheduling bottlenecks.
4. Track waiting time trends regularly to support operational planning.
